PROFESSIONAL SUMMARY

Data Analyst and final-year IT Engineering student with internship experience in data analysis, business intelligence, and predictive analytics. Skilled in Python, SQL, Power BI, Excel, and Tableau with a strong foundation in statistical analysis, A/B testing, and dashboard development. Analyzed 50+ structured datasets across finance, real estate, and HR, combining domain knowledge with Generative AI to automate workflows and deliver actionable business insights. Building expertise in cloud analytics (AWS/Azure) and modern data stack tools (dbt, Airflow).

TECHNICAL SKILLS

- Data Analytics:** Python (Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn), SQL, Statistical Analysis, Descriptive Statistics, Hypothesis Testing, A/B Testing, Regression Analysis, Trend Analysis, Forecasting, Segmentation, Cohort Analysis, Root Cause Analysis, Data Mining, EDA, Data Cleaning, Missing Value Imputation, Data Validation
- Data Quality & Governance:** Data Profiling, Gap Analysis, Source-to-Target Mapping, Data Documentation, Process Flow Documentation, Requirements Gathering, User Acceptance Testing (UAT), Workflow Optimization, Data Quality, Data Governance
- AI/ML:** Machine Learning, Supervised Learning, Random Forest, Feature Engineering, Model Evaluation (R-squared, MAE), Predictive Analytics, Model Deployment & Monitoring, Generative AI, Prompt Engineering, Workflow Automation
- SQL & Databases:** MySQL, PostgreSQL, RDBMS, Joins, Window Functions (RANK, DENSE_RANK, LEAD/LAG), CTEs, Subqueries, Query Optimization, Indexing, Stored Procedures, ETL Pipelines, Data Warehousing, Data Modeling, Star Schema
- BI & Visualization:** Power BI (Advanced DAX, Star Schema), Tableau, Streamlit, Looker Studio, Ad-hoc Analysis, Executive Reporting, Reporting Automation, Self-Service BI, Scorecards, Report Specifications, KPI Reporting, Data Storytelling, Advanced Excel (Pivot Tables, XLOOKUP, Power Query), Google Sheets (Apps Script)
- Cloud & Tools:** AWS (S3, EC2, Glue), Azure DP-900, dbt, Apache Airflow, Docker, Git, GitHub, VS Code, Jupyter Notebook, Postman, REST APIs
- Financial Knowledge:** Financial Modeling, Cost-Benefit Analysis, CAGR, Sharpe Ratio, Mutual Funds, SIPs, Equity Markets

EXPERIENCE

Data Science Intern | Skymind IT Training and Solutions

Nashik, India

Jan 2026 – Mar 2026

Internship

- Cleaned, analyzed, and validated structured datasets using Python, SQL, and Excel, applying missing value treatment and exploratory data analysis (EDA).
- Built supervised ML regression models for residential property valuation and regional price trend analysis, improving prediction accuracy through feature engineering.
- Designed Power BI dashboards and BI reports to track operational KPIs and deliver data-driven market insights to stakeholders.
- Automated data wrangling and workflow optimization with AI-assisted Python scripts, enforcing schema validation and data governance checks to reduce manual preprocessing errors.

KEY PROJECTS

RentalIQ: Property Valuation & Deal Assessment Engine

[Live App] | [GitHub]

Python, Pandas, NumPy, Scikit-Learn, Streamlit, Git

- Engineered an ML regression model analyzing 4,700+ records to estimate fair-market residential rent across Indian metro hubs, achieving R-squared of 0.75 and MAE of INR 4,631.
- Performed feature engineering via Regex extraction and IQR outlier filtering; deployed as a live Streamlit dashboard with rate/sq. ft. analytics and automated deal classification.
- Automated ETL and data validation to ensure model reliability and market benchmarking for end users.

PeoplePulse: HR Analytics & Workforce Attrition Dashboard

[GitHub]

Python, SQL, Power BI, Pandas, Statistical Analysis, Data Storytelling

- Analyzed a 5,000-employee HR dataset across 15+ dimensions (tenure, satisfaction, overtime, stress, promotion gaps) to uncover root causes of an 11.3% attrition rate.
- Engineered a risk-segmentation model flagging 75 high-risk employees churning at 58.7% vs 6.4% for low-risk — a 9x gap enabling targeted retention action.
- Identified key churn drivers: new hires (<1 yr) exit at 29.1%, overtime workers churn 2.4x more, and stalled promotions (4+ yrs) correlate with 13.5% attrition.
- Delivered an executive dashboard with 5 analytical views and 4 data-backed retention recommendations, translating raw HR data into a cost-saving action plan.

EDUCATION

Bachelor of Engineering in Information Technology

Expected 2027

JIT Institute, Nashik, India

Diploma in Computer Engineering

2024 | Score: 84.24%

Loknete Gopinathji Munde Institute of Engineering Education & Research, Nashik, India

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera
- Generative AI for Data Analysts Specialization – IBM/Coursera
- Artificial Intelligence & Machine Learning (AIML) – Coding Seekho Training Institute
- Microsoft Azure Data Fundamentals (DP-900), AWS Cloud Practitioner, dbt Fundamentals – In Progress

SOFT SKILLS & LANGUAGES

Soft Skills: Analytical Thinking, Problem Solving, Stakeholder Management, Business Acumen, Cross-functional Collaboration, Process Improvement, Requirements Documentation

Languages: English (Professional), Hindi (Fluent), Marathi (Native)
