PROFESSIONAL SUMMARY

Final-year Information Technology Engineering student skilled in Data Analytics, Business Intelligence, and Financial Analytics. Proficient in Python, SQL, Power BI, Excel, and Tableau, with hands-on experience in data cleaning, EDA, statistical analysis, dashboard development, and predictive modeling. Experienced in applying Generative AI to automate data workflows and derive actionable business insights.

TECHNICAL SKILLS

- Data Analytics & Cleaning:** Data Cleaning, Missing Value Imputation, Exploratory Data Analysis (EDA), Python (Pandas, NumPy), IQR Outlier Filtering, Scikit-Learn, Statistical Modeling, Hypothesis Testing, Data Validation
- Artificial Intelligence:** Prompt Engineering (LLMs), Generative AI for Code & Data Prep, Machine Learning Regression, NLP Basics, Workflow Automation
- SQL & Databases:** SQL, MySQL, Relational Database Management (RDBMS), Joins, Window Functions (RANK, DENSE_RANK, LEAD/LAG), CTEs, Aggregations, Grouping, Subqueries, ETL Pipelines
- BI & Visualization:** Power BI (Advanced DAX, Star Schema Modeling), Tableau, Streamlit, Advanced Microsoft Excel (Pivot Tables, Dashboards, XLOOKUP, Power Query)
- Financial Knowledge:** Mutual Funds, SIPs, Equity Markets, Portfolio Tracking, Return & CAGR Analysis, Risk-Adjusted Returns (Sharpe Ratio), Variance Analysis, Financial Modeling
- Tools & Frameworks:** Git, GitHub, VS Code, Jupyter Notebook, Joblib, Pyttsx3, Speech Recognition, REST APIs

EXPERIENCE

Data Science Intern | SkyMind IT Training and Solutions

Nashik, India

Duration: Jan 2026 - Feb 2026

Internship

- Performed comprehensive data cleaning, missing value treatment, and exploratory data analysis (EDA) using Python, SQL, and Excel across structured datasets.
- Developed analytical solutions and supervised machine learning regression models for residential property valuation and regional price trend analysis.
- Constructed interactive visual summaries, Power BI dashboards, and business intelligence reports to deliver data-driven market insights and monitor operational KPIs.
- Applied AI-assisted data wrangling scripts to accelerate pipeline automation, enforce schema validation, and minimize manual preprocessing errors.

KEY PROJECTS

RentalIQ: Property Valuation & Deal Assessment Engine

[\[Live App\]](#) | [\[GitHub\]](#)

Python, Pandas, NumPy, Scikit-Learn, Streamlit, Git

- Engineered an ML regression model analyzing 4,700+ records to estimate fair-market residential rent across Indian metro hubs.
- Extracted structural features from composite floor strings via Regex and applied Interquartile Range (IQR) filtering to remove luxury outliers and preserve data integrity.
- Trained a Random Forest Regressor yielding an R^2 score of 0.75 and an average Mean Absolute Error (MAE) of INR 4,631.
- Deployed a live Streamlit dashboard providing dynamic rate/sq. ft. analytics, automated deal classification, and market benchmarking.

Interactive Financial Portfolio & Investment Dashboard

[\[GitHub\]](#)

Power BI, Advanced Excel, SQL, Financial Data Modeling

- Built a dynamic investment tracking dashboard monitoring asset allocation across equities, mutual funds, and recurring SIP portfolios spanning 1,200+ transaction records.
- Formulated custom DAX measures to calculate annualized returns (CAGR), benchmark deviations, capital allocation trends, and risk-adjusted metrics (Sharpe Ratio).
- Automated ETL data transformation pipelines to convert relational transaction records into clear executive-level visual summaries and star-schema models.

ACHIEVEMENTS & HIGHLIGHTS

- Analyzed, cleaned, and preprocessed 50+ diverse structured datasets spanning equities, financial transactions, and real estate markets—standardizing data cleaning pipelines, missing value imputation, and EDA workflows.
- Engineered and deployed a production machine learning valuation engine (RentalIQ) processing 4,700+ property records, achieving an R^2 score of 0.75 with active cloud availability.
- Integrated Generative AI and advanced prompt engineering frameworks to optimize SQL query generation, automated data cleaning scripts, and repetitive analytical tasks.

EDUCATION

Bachelor of Engineering in Information Technology

Expected 2027

JIT Institute, Nashik, India

Diploma in Computer Engineering

2024 | Score: 80.86%

Loknete Gopinathji Munde Institute of Engineering Education & Research, Nashik, India

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera
- Generative AI for Data Analysts Specialization – IBM/Coursera
- Artificial Intelligence & Machine Learning (AIML) – Coding Seekho Training Institute

SOFT SKILLS & LANGUAGES

Soft Skills: Analytical Thinking, Problem Solving, Data Storytelling, Stakeholder Communication, Business Acumen, Requirements Gathering

Languages: English (Professional), Hindi (Fluent), Marathi (Native)
